

EH70 SERIES 1/2" TO 2" PIPE SIZE

Features:

The powerful, full port EH70 is great for a wide range of flow rates, temperatures, and a wide range of fluids and gases. It has become a popular choice for cryogenic conditions and applications that need to control higher pressures in a hazardous location. This pilot assisted, direct operated valve utilizes a UL/CSA certified enclosure for all hazardous locations, is available in larger pipe sizes (up to 2") and for inlet pressures up to 1,500 PSIG. The versatile EH70 requires no minimum pressure for opening, and has the option to be universally mounted (Normally Closed and Normally Open). This valve is CRN certified with all Canadian provinces. Other uses of the EH70 include controlling the flow of corrosive fluids, deionized water, condensate, ammonias, vegetable oils, fuel oils, hydrogen, cryogenics, flammable liquids and gases and other gases or liquids compatible with materials of construction. **Filters recommended for all applications.**

Electrical (Coil)

Coil:
Encapsulated Class "H", 36" leads - All AC/DC Voltages

Coil Enclosure:
Carbon Steel - Coil enclosure is completely seal-welded
NEMA 4 (watertight), NEMA 7, NEMA 4X optional

Coil Option:
Explosion-Proof for Class I, Division 1, Groups A-D for Operating Temp Code T2D,
- Range -20 to +85 degrees C. (Ambient)

Coil Option:
ATEX/IECEX coil
Temperature Class: T3 for -20° to +60° C surrounding air,
cryogenic to +150° C fluid
 II 2G Ex db IIC T3 Gb, -20° C ≤ Ta ≤ max. +60° C

Conduit Connection:
1/2" NPT
